Dear Dr. Agha,

It was a pleasure to meet you. I am writing to express my interest in your project and, in particular, my interest in serving as the project's faculty leader.

I am particularly interested in the economic and management sciences and social and behavioral sciences components of your project.

I am currently pursuing research on Iranian energy and environmental issues.

My research objectives include:

1. Understanding individual, group and firm behavior in Iran, and how different institutions and policies (and changes in policies and institutions), including global warming and energy policy, affect this behavior and its outcome;
2. Understanding the energy industry in Iran, and in particular the economic impact of global warming and energy policy;
3. Understanding the impact of global warming and energy policy on the behavior of Iranians; and
4. Designing institutions and policies, including energy and environmental policy, to maximize social welfare.

Thank you for organizing this important project. I look forward to hearing from you.

Sincerely,
Cynthia Lin
