Tucson, AZ 85712

RE: Global Warming

Dear Dr. Agha,

I hope this letter finds you well, although it has been relatively challenging to find individuals who have your vision and forward thinking. I have tried to some extent to convince UC Davis to participate in this cause. And hopefully, through dialogue among scientists and scholars, we may have a bridge between people of Iran and people of U.S.

I want to thank you for your efforts. I am confident that you will find individuals in Iran who are global and will assist us in finding ways for reconciliation. It is my hope to advance and promote relationships through education and understanding. I am at your discretion.

Best Regards,

Mohammad Mohanna  
Enclosure
