FACULTY OF ENVIRONMENT

Dear Dr. Aghamohammadi

As the Dean of the Graduate School of the Environment at the University of Tehran, I would like to thank you for sharing your critically needed project, the Earth Muslims and Climate Change (EMCC) initiative, and for inviting us to collaborate with it.

We would be happy to do so, in all appropriate and possible areas. However, as expressed in the letter by Dr. Mohammad Mousavi, Director General of our university's International Relations and Research, we are unable to allocate any funds for this work at this point in time.

But, given the mission of our college, which is in obvious harmony with your initiative's objectives, we would be happy to play our role to assist and collaborate with this obviously urgent interdisciplinary and multi-dimensional global environmental project, whose success will be needed if life on our planet is to survive and prosper.

Given the above, our colleagues and I will look forward to working with you and other colleagues around the world, as appropriate and possible, as the important work of the Earth Muslims and Climate Change (EMCC) initiative continues to unfold. Sincerely,

G.R. Nabi
